

EDUCATION

- **ISEP** Paris, France
Engineering Degree – Specialization in Artificial Intelligence Sept. 2021 – Jul. 2026
- **UNIVERSITY OF CALIFORNIA, BERKELEY** Berkeley, CA, USA
Exchange, Statistics (Machine Learning, Deep Learning, AI Optimization), Data Science and Ethics, Social Implications of Technology, Computational Creativity, GPA: 4.0 Aug. 2025 – Dec. 2025
- **Inha University** Incheon, South Korea
Exchange, Circuit Analysis, Sensor Eng., Programming, Signals & Systems, Leadership Jan. 2023 – Jul. 2023

EXPERIENCE

- **Agentic AI / GenAI Consultant – Supply Chain** Paris, France
Capgemini Feb. 2026 – Jul. 2026
 - **Contributed** to shaping Capgemini's agentic Supply Chain offering through use-case roadmaps, business models and ROI frameworks; presented solutions to global leaders in **cosmetics**, **entertainment** and **luxury goods**.
 - **Contributed** to a global **cosmetics** leader's Manhattan Active support transformation: prioritizing 6 agentic use cases and defining their architecture, feasibility, roadmap, business model and path to production.
 - **Developed** a reusable **Manhattan MCP**, enabling AI agents to leverage WMS knowledge, investigate incidents and interact with operations while supporting the commercial offer.
 - **Led** the end-to-end development of a warehouse agent, from pain-point analysis to a successful live demo, and its pre-sales positioning for reporting automation and Capgemini's first agentic slotting use case.
 - **Built** additional client and internal POCs, including a **Transfer of Work Orchestrator** for an **aerospace** manufacturer and training-material generation agents, while contributing to the **Skill Market**.
 - **Capitalized** on project knowledge by turning deliverables into shared, reusable assets and leading REX sessions, training and presentations across the practice and wider BA community.
- **R&D Algorithm Development Engineer** La Défense, France
EPC Groupe Jul. 2024 – Dec. 2024
 - **Developed** drilling/mining software: QA/QC tools, dilution management, FEM (finite element) integration.
 - **Designed** geometric processing algorithms (point clouds, meshes, drillhole deviation).
 - **Optimized** numerical simulation pipelines: computational accuracy and runtime performance.
 - **Ensured** user needs gathering and product iteration in a multidisciplinary R&D context.

PROJECTS

- **AI Ethics & Sociotechnical Design – UC Berkeley** Analysis of a real R&D conflict (FEM simulation vs. commercial heuristic): application of Jasanoff, Perrow, Wynne frameworks – engineering friction, AI risks and social implications of technology.
- **Architecture & Business Model – UC Berkeley** Design of an AI/human music differentiation webapp: system design, infrastructure, recommendation pipeline, monetization model and go-to-market strategy.
- **ML – Imbalanced Multi-class Image Classification** Benchmarking SVM, XGBoost, LogReg (scikit-learn) on imbalanced image dataset; SelectKBest and Stratified K-Fold optimization, macro F1-score maximization.
- **ML – Regression & Deep Learning – UC Berkeley** Wine quality prediction: regression (score ordinality); multi-model benchmarking, hyperparameter tuning, RMSE, MAE and R^2 evaluation.

SKILLS

- **AI / Programming** : LLM, RAG, Prompt Engineering, Fine-tuning, Multi-agent, REST API, PyTorch, OpenCV, scikit-learn, Vertex AI (GCP), Azure OpenAI, MCP, Python, Git, Java, HTML/CSS, JavaScript, SQL, Matlab, C, $\text{\LaTeX}$
- **Soft Skills** : Curiosity, Versatility, Agility, Proactivity, Cross-functional Communication, Empathy, Teamwork
- **Interests** : Photography/Video, Guitar, Piano, 3D Printing/Modeling, Cars, Drawing, Swimming
- **English** C1 (DET CEFR C1, TOEIC 940/990), **Spanish** B1/B2
